2. Called Congressman Saylor's (R., Pa.) office in connection with the [] case and spoke with Mr. Fox who is handling the matter for the Congressman. Mr. Fox was advised we were looking into the case and will be back in touch with him on Monday or Tuesday.

3. [] (OCR) called to say that he received a call from Colonel Schuppen on the staff of the House Space Committee. Schuppen indicated in the Committee's hearings on the translation and dissemination of scientific information much of the testimony received pointed to the roll which CIA played in this program. He felt it would be desirable for the Agency to testify before the Committee on this subject. He suggested an Agency appearance on Wednesday 3 June or at a time subsequent to 16 June. In a call back to Schuppen's office to Mr. Carstarphen, it was suggested that in view of Mr. Borel's absence until Wednesday morning, the 3 June date was not desirable from our standpoint. Carstarphen indicated that there was no pressure to have us appear on the 3rd and arrangements could be made for an appearance at a later time. We are to discuss this further with Colonel Schuppen next week.
